

## ***Lighthouse Landing Lighthouse***

We are nearing the completion of our new Lighthouse located on the south breakwall. The 186 feet of lighted boardwalk leads you along the top of the breakwall to the Lighthouse. All work is being done by Keith Steele Construction. Keith and his crew were excited about building the first Lighthouse on Kentucky Lake. The location preempted Keith from using conventional methods. The walkway to the Lighthouse was built in 8 foot sections. Before each section could be built, large rocks had to be moved by hand to make a place for the posts. Once the posts were put into place, concrete, mixed with lake water in a wheel barrow, was placed around each post. 300, 80# bags of concrete (24,000#) were carried by hand, while climbing the rock breakwall. A very difficult and exhausting job was well done. The top of the Lighthouse stands 40 feet above the water at winter pool. The view from the Lighthouse is beautiful, so when you take the stroll on the boardwalk, don't forget your camera. Once completed, the Lighthouse will be our welcome sign to all those who visit Lighthouse Landing.

## ***Pier 3***

Those of you who keep your boats on Pier 3 at Lighthouse Landing will notice a nice improvement this spring. All the old, white foam floatation was replaced with black plastic encapsulated foam floats. These floats enable debris to flow through making for a much cleaner surrounding plus they raised the dock higher off the water making for easier boarding. New underwater support braces will soon be added to each finger completing the project.

## ***New Cottages***

We have three, 1 bedroom cottages under construction. They are the same as cottages S-1 through S-4 and are located just above and south of S-4. They all have whirlpool tubs, gas log stoves and incredible views of Kentucky Lake and should be completed by mid-April, if not sooner.

## ***Cottage Improvements***

We are in the process of adding dishwashers to most of the cottages at Lighthouse Landing. The only cottages that will not have dishwashers will be S-1 through S-4 but we hope to add them in 2004. Those of you who always ask for cottages N-1 or N-2 will be happy to know that we replaced the cook top with a stove and oven. You'll have to find a new excuse now for not cooking!
